2016 – 2020

Elementary
San Fernando Elementary School
2010 – 2016

PROFILE

Recent IT graduate with hands-on experience gained through my internship at the Department of Trade and Industry (DTI), where I assisted in developing and maintaining internal systems, performing system testing, troubleshooting technical issues, and providing IT support. Proficient in PHP, Laravel, MySQL, HTML, CSS, and JavaScript, with a strong foundation in web development and database management. Passionate about building reliable and user-friendly applications, I am eager to contribute my technical skills, adaptability, and commitment to supporting DTI's digital initiatives while continuously growing as an IT professional.

EXPERIENCE

Department of Trade and Industry (DTI) – Pampanga

- Developed an online Daily Time Record (DTR) system used by DTI staff to log attendance during work-from-home arrangements.
- Built the 365 Ranking System, a peer evaluation platform where employees rank their co-workers within their own department, deployed office-wide across DTI Pampanga.

PROJECTS

SmartBasura — IoT Waste Bin Monitoring & Logistics Routing System

Barangay Waste Management

- Developed a smart waste monitoring system that detects fill levels using sensors and sends real-time data to a web dashboard.
- Built the admin dashboard to monitor trash bin status and generate reports for waste collection.
- Integrated Arduino/ESP32 hardware components with a database to store and visualize data efficiently.

E-Commerce Web Platform

- Developed a responsive online shopping website featuring product catalogs, cart management, and checkout functionality.
- Implemented secure user authentication and an admin panel for inventory control.

Personal Portfolio Website

- Built and deployed a personal developer portfolio using Node.js and HTML, hosted live on Vercel.

Digital Photo Booth Web App

- Developed a browser-based photo booth application in PHP and JavaScript that captures photos and sends users a shareable link to their photos.

EasyThesis

- Built a web-based thesis management platform with student login/signup, a personal dashboard, and an admin panel, backed by a Python API.

Contract Generator

- Developed a contract generator web application with a dedicated admin panel and an API backend for creating business documents, deployed on Vercel.

Additional Web Projects

- Coffee Shop Landing Page — responsive HTML landing page for a coffee shop business (coffeeshop-mu.vercel.app).
- Business Website — responsive HTML landing page for a small business (business-website-two-mocha.vercel.app).
- Batch Photo Gallery Site — HTML web page showcasing a class/batch photo gallery.
